EDUCATION

Ramrao Adik Institute of Technology

Navi Mumbai, Maharashtra

Bachelor of Engineering (2018 - 2022)

CGPA : 8.76

KJ Somaiya Jr College of Science and Commerce

Mumbai, Maharashtra

HSC (2018)

Percentage : 83.38 %

KVK Ghatkopar High School

Mumbai, Maharashtra

SSC (2016)

Percentage : 91.20 %

SKILL SUMMARY

Languages : Java, JavaScript, SQL, Python, HTML, CSS

Frameworks/Libraries : React JS, jQuery, Node JS, Angular, Angular Material UI, Bootstrap, Spring, Hibernate

Tools : MySQL, Gitlab, Github, Jira, Docker, Postman, AWS Console, MobaXterm, Linux Commands

Platforms : Eclipse IDE, Visual Studio Code, Jupyter Notebook

Soft Skills: Excellent Communication, Strong Teamwork, Time Management, Critical Thinking, Attention to Detail

WORK EXPERIENCE

Jr Software Engineer | Cognizant

06/2023 - Present

- Leveraged Java, Spring Boot, and JavaScript to architect, develop, and maintain robust web applications, prioritizing performance, code quality, and user experience.
- Optimized database operations with MySQL and Shell Scripting, effectively managing large datasets and streamlining data management processes.
- Spearheaded incident resolution and problem management initiatives, resulting in a 25% reduction in system downtime and improved overall system reliability.
- Streamlined operations by automating 20% of manual processes, leading to increased productivity and cost savings.

Intern | Cognizant

10/2022 - 03/2023

- Learned trending tools such as Microservices, Jenkins, Docker, Application Debugging, Cloud and AWS services for project deployment and development.
- Learned valuable insights and best practices from my senior colleagues, including how to approach complex problem-solving, collaborate effectively with cross-functional teams, and write high-quality and maintainable code for both back-end and front-end.

PROJECTS

Pariksha - Online Exam Portal using Spring Boot and Angular 01/2023 - 03/2023

- A full-stack app for an online exam portal is a robust and efficient platform for managing exams, while also allowing for easy customization and extension developed using Spring Boot, Hibernate & Angular.
- It includes several RESTful APIs that allow users to perform various operations such as registering for an exam, submitting answers, and viewing results with features like authentication and authorization for a secure experience.

Handwritten Digit Classifier 02/2022 - 03/2022

- An interface that classifies handwritten digits from 0 to 9 with a precision rate of almost 85% using React, Django, CNN, and TensorFlow with an interface for the Artificial Intelligence Application.
- Deployed a CNN model with TensorFlow on Django REST API and served with React & Sketch.

Smart Contact Manager 03/2023 - 04/2023

- Smart Contact Manager is a web application built with Spring Boot, Hibernate, and Thymeleaf that allows users to securely manage and store their contacts.
- The application features essential functionalities like registration and login, authorization and security, search functionality, change password module, forgot password module, and payment integration.
- Smart Contact Manager provides a user-friendly and scalable interface that enables easy addition, updating, and deletion of contacts, making it an indispensable tool for professionals, organizations, and individuals alike.

CERTIFICATES

- AWS Certified Cloud Practitioner April 2024
- CISCO Devnet Associate September 2021

ACHIEVEMENTS

- First Rank in Mumbai University's Youth Festival in University Level Skit Competition (Marathi) - 2019
- First Rank in Mumbai University's Youth Festival in Zonal Level One Act Play Competition (Marathi) - 2019
