Software Engineer with 2+ years of experience building scalable web applications using Java, Spring Boot, and modern JavaScript frameworks. Proven track record in optimizing system performance, reducing downtime by 25%, and automating critical processes. AWS Certified Cloud Practitioner with hands-on experience in microservices architecture, RESTful API design, and cloud deployments.

EDUCATION

Ramrao Adik Institute of Technology - Mumbai | Bachelors of Engineering | CGPA : 8.76/10

June 2018 - May 2022

EXPERIENCE

Jr Software Engineer | Cognizant

June 2023 - Present

- Architected and developed enterprise-grade web application using Java, Spring Boot, and JavaScript, serving 10,000+ daily active users with 99.5% uptime and sub-200ms response times.
- Designed and optimized RESTful APIs and MySQL database schemas, implementing indexing strategies and query optimization that reduced data retrieval time by 45% for datasets containing 500K+ records.
- Owned end-to-end incident management pipeline; implemented automated monitoring and alerting system using Shell scripting that reduced Mean Time to Resolution (MTTR) by 40% and system downtime by 25%.
- Collaborated with cross-functional teams in an Agile environment to deliver 15+ features on schedule, participating in code reviews, architectural discussions, and sprint planning to ensure high code quality and system reliability.

Intern | Cognizant

October 2022 - March 2023

- Completed intensive training in cloud-native technologies including Microservices architecture, Docker containerization, Jenkins CI/CD pipelines, and AWS services (EC2, S3, RDS, Lambda)
- Collaborated with senior engineers on production application debugging, gaining hands-on experience with distributed systems troubleshooting, log analysis, and performance profiling.
- Applied software engineering best practices including test-driven development, code reviews, and version control (Git), contributing to 5+ production releases during internship period.

PROJECTS

Pariksha - Scalable Online Exam Portal

- Architected distributed exam platform using Spring Boot microservices and Angular, designed to support 1,000+ concurrent users with horizontal scaling capabilities and 99.9% availability.
- Designed and implemented RESTful API layer with JWT-based authentication and role-based authorization (RBAC), ensuring secure access control for students, instructors, and administrators.
- Built robust backend using Hibernate ORM with MySQL, implementing database connection pooling, query optimization, and transaction management for handling 50K+ exam submissions.

Handwritten Digit Classifier - AI-Powered Recognition System

- Built machine learning application using CNN (Convolutional Neural Network) with TensorFlow, achieving 85% accuracy in classifying handwritten digits (0-9) on MNIST dataset.
- Designed full-stack architecture with Django REST API backend and React frontend, enabling real-time digit recognition with <500ms inference time for user-drawn sketches.
- Developed interactive Canvas-based UI in React allowing users to draw digits, integrated with WebSocket for real-time prediction feedback and result visualization.

Smart Contact Manager - Enterprise Contact Management System

- Developed full-stack web application using Spring Boot, Hibernate, and Thymeleaf, enabling users to manage 10,000+ contacts with search, filter, and export capabilities.
- Implemented comprehensive security architecture using Spring Security with OAuth 2.0, featuring user authentication, password encryption (BCrypt), session management, and CSRF protection.
- Built advanced search functionality with pagination and full-text search capabilities, optimising database queries to handle large datasets with sub-second response times.

SKILLS

Programming: Java (Core, OOP, Concurrency, Streams, Collections), Python, JavaScript, SQL

Backend & APIs: Spring Boot, Spring MVC, Hibernate, Node.js, Django, RESTful APIs, Microservices

Frontend: React, Angular, Thymeleaf, Bootstrap

Databases: MySQL, PostgreSQL (Design, Indexing, Optimization)

Cloud & DevOps: AWS (EC2, S3, RDS, Lambda, CloudWatch), Docker, Jenkins, CI/CD Pipelines

Tools & Platforms: Git/GitHub, GitLab, Jira, Postman, Maven, Linux/Unix, Shell Scripting

Methodologies: Agile/Scrum, TDD, Code Reviews, System Design, Performance Optimization

CERTIFICATIONS

- AWS Certified Cloud Practitioner**
 - CISCO Devnet Associate**
- April 2024
- September 2021
